Do Not Claim — Read Before Promoting

Do not claim ConsensusPress guarantees truth, rankings, or traffic recovery.

Do not claim AI search engines ban or penalise single-model content. They evaluate content for depth, Information Gain, and usefulness — not for how many models generated it.

Do not use the phrase 'liability-free content' or 'your traffic is back' as a guarantee.

Do not say 'No other WordPress plugin does this.'

APPROVED: 'We are not aware of another WordPress.org publishing plugin that makes five-model consensus validation the core workflow.'

APPROVED traffic claim: 'Many site owners report fewer clicks from search where AI summaries answer the query directly.'

REQUIRED disclaimer in all copy: ConsensusPress does not replace human editorial or subject-matter review.

Segment 1 — SEO Bloggers

Audience: Niche site owners, affiliate marketers, authority site builders

Best for: Aggressive affiliate audiences — keep tone direct

Email Swipe

Subject: Your rankings are fine. Your traffic is gone. Here's why.

Hi [Name],

You've seen it already.

Posts sitting at positions 6–8 on Google. No clicks. AI Overviews answer the query before anyone reaches your link.

The problem isn't your rankings. It's your citation architecture — in other words, your content may rank, but it may not be structured in the way AI answer engines prefer to cite.

Many site owners report fewer clicks from search, especially where AI summaries answer the query before anyone reaches their link. The fix is content built for AI extraction, not just Google crawl. Cross-model validated. Schema-ready. Structured for citation.

That's what ConsensusPress does.

Five AI models compare outputs and flag disagreements before the draft reaches your review queue. No single model is trusted alone.

Free to start. Three posts per month. No credit card required.

[YOUR AFFILIATE LINK]

To your traffic,
[Name]

P.S. 210+ posts proven across 5 live sites. Average Rank Math score 80+. All indexed. This is not theory.

ConsensusPress supports risk reduction and workflow validation. It does not replace human editorial or subject-matter review.

Social Post

Your post is ranked position 7.

Zero clicks this month.

AI Overviews answered the query before anyone reached your link.

The problem isn't ranking. It's citation architecture.

ConsensusPress compares five AI model outputs and flags disagreements before the draft reaches your review queue. Built for the AI-search era. Free on WordPress.org.

Segment 2 — WordPress Agencies

Audience: SMB clients, content agencies, SEO agencies

Best performing segment — highest paid conversion potential

Email Swipe — Flagship Version

Subject: One hallucination in a client post. One lost retainer.

Hi [Name],

If your agency uses AI for client content, you already know the risk.

One hallucinated statistic.
One fabricated quote.
One wrong fact published under your agency's name.

That is a credibility problem.

ConsensusPress is the audit layer between AI generation and client delivery.

It validates every WordPress post across five independent models — OpenAI, Claude, Gemini, Mistral, and Cohere — then flags disagreements before the draft reaches human review.

You still make the final editorial decision. ConsensusPress gives you a stronger quality gate before the client ever sees the post.

Gold gives you 60 posts per month for $149 — about $2.48 per validated post.

Free tier available on WordPress.org.

[YOUR AFFILIATE LINK]

[Name]

P.S. If you already use ChatGPT, Jasper, Writesonic, Koala, or another AI tool, ConsensusPress does not need to replace them. It sits after them as the validation layer before publishing.

ConsensusPress supports risk reduction and workflow validation. It does not replace human editorial or subject-matter review.

Social Post

Your client just published an AI post.

One model. No validation. No audit trail.

If it hallucinates, that's your reputation.

ConsensusPress runs every post through 5 models simultaneously. Disagreements flagged. Consensus draft produced for your review.

$149/month. 60 posts. $2.48 per validated post.

Your quality signal.

Segment 3 — AI Tool Reviewers

Audience: Tech YouTubers, newsletter writers, tool comparison sites

Best for: Exposure and affiliate promotion — first-mover angle

Email Swipe

Subject: Most AI writing tools focus on generation. This one focuses on validation.

Hi [Name],

Your audience has already seen every AI writing tool.

Jasper. Copy.ai. Writesonic. Koala. Byword.

Most of them follow the same pattern: one model, one output, publish and hope.

ConsensusPress is different. Structurally different.

Five models — OpenAI, Claude, Gemini, Mistral, and Cohere — respond independently to the same topic. Their outputs are cross-validated. Disagreements are flagged. A consensus draft is produced for human review.

We are not aware of another WordPress.org publishing plugin that makes five-model consensus validation the core workflow.

It is also free to start. Three posts per month on the free tier, so your audience can test it before spending anything.

50% commission for the next 30 days.

[YOUR AFFILIATE LINK]

[Name]

P.S. The plugin is live on WordPress.org today. Real installs. Real reviews coming. Strong first-mover angle for your audience.

ConsensusPress supports risk reduction and workflow validation. It does not replace human editorial or subject-matter review.

Social Post

Most AI writing tools focus on generation.

One model. One output. Publish and hope.

ConsensusPress focuses on validation.

Five models respond independently. Outputs are cross-validated. Disagreements flagged. Consensus draft produced for review.

Not just AI-generated. AI-validated.

Free on WordPress.org.

Segment 4 — Content Marketers

Audience: B2B brands, SaaS companies, in-house content teams

Email Swipe

Subject: Your content pipeline has a single point of failure.

Hi [Name],

Every piece of content your team publishes currently runs through one AI model.

That model has a bad day.
It hallucinates a competitor's pricing.
Gets a regulation wrong.
Fabricates a study.

Your brand publishes it.

ConsensusPress removes that single point of failure.

Five models validate every post independently. Cross-model agreement means the draft goes to your review queue. Disagreement means a risk flag surfaces before you see it.

ConsensusPress does not replace expert review for regulated or high-stakes topics — but it gives your team a stronger validation step before publication.

It works inside WordPress. No new workflow. No new platform. Install the plugin, enter your topic, and get a consensus-validated draft.

Free to start.

[YOUR AFFILIATE LINK]

Segment 5 — Freelancers

Audience: Expert-Rated Upwork sellers, Top-Rated Fiverr sellers, SEO content freelancers

Version A — Direct (for affiliate audiences)

Subject: Your clients are one hallucination away from a 1-star review.

Hi [Name],

You deliver AI content to clients.

One bad output — one hallucinated fact, one fabricated statistic — and your 5-star rating can disappear.

ConsensusPress is your quality signal.

Five AI models validate every post before it reaches your client. You deliver cross-validated content. Not just generated — audited.

Tell clients this:

> "Every post I deliver is validated by five independent AI models before you see it."

That is a differentiator most freelancers cannot claim.

$49/month. 15 posts. $3.27 per validated post.
Free tier available to test — 3 posts per month, no credit card.

[YOUR AFFILIATE LINK]

[Name]

P.S. Refer your clients directly and earn 40% affiliate commission on every subscription they take out.

ConsensusPress supports risk reduction and workflow validation. It does not replace human editorial or subject-matter review.

Version B — Professional (for newsletter, Upwork outreach)

Subject: Give clients a stronger quality signal on every article.

Hi [Name],

If you deliver AI-assisted content to clients, here is a simple way to strengthen your quality process.

ConsensusPress runs every WordPress post through five independent AI models before it reaches your review queue. Disagreements are flagged. You make the final editorial call.

You can tell clients: 'Every article I deliver is cross-validated across five AI models before you see it.'

That is a professional differentiator most content providers cannot offer.

Free tier available — 3 posts per month, no credit card. $49/month for 15 posts.

[YOUR AFFILIATE LINK]

[Name]

ConsensusPress supports risk reduction and workflow validation. It does not replace human editorial or subject-matter review.

Social Post

You deliver AI content to clients.

One hallucination = one negative review.
One negative review = lost retainer.

ConsensusPress validates every post through 5 models before your client sees it.

Your quality signal. Your differentiator. Your validation layer.

Free on WordPress.org.

Quick Positioning Lines

Use in emails, posts, banners, or promos:

- **Not just AI-generated. AI-validated.**
- **Five models. One stronger signal. Built for the AI-search era.**
- **No single model is trusted alone.**
- **Consensus before publishing.**
- **Built for the AI-search era.**
- **Cross-model validated. Schema-ready. Structured for citation.**
- **We are not aware of another WordPress.org publishing plugin that makes five-model consensus validation the core workflow.**

Closing Notes for Affiliates

ConsensusPress AI Publisher is easiest to position around four themes:

1. **Traffic loss from AI Overviews — rankings may be intact; clicks are disappearing.**
2. **Hallucination risk in AI content — one wrong fact under your name is expensive.**
3. **Five-model validation as the differentiator — not generation speed, validation depth.**
4. **Free tier removes friction to try — zero cost, no credit card, full functionality.**

Use whichever angle best matches your audience. The agency and reviewer swipes have the strongest conversion potential.

Final Checklist

Before using this swipe file:

- **Replace [YOUR AFFILIATE LINK] with your approved WarriorPlus link**
- **Replace [Name] with your name, brand, or signoff**
- **Download and attach the right social image from the affiliate page**
- **Adjust tone for your audience — use Version A or B for freelancers**
- **Keep the core message: five-model consensus validation before publish**
- **Do not claim guarantees of traffic recovery, ranking, or liability-free content**
- **Include the disclaimer in all email sends**
